There's still a lot of vote left in Milwaukee, Detroit and Philadelphia, but for Harris to win she would need to outperform Biden's numbers there in 2020, and so far she's underperforming Biden's results just about everywhere in the country.

Harris in the latest survey. The vice president's lead among women has shrunk from 18 points to 11 points since last month.

The gender split in this poll is nearly identical to the one between Biden and Trump in 2020, according to AP VoteCast surveys of the electorate.

When it comes to race, however, the latest poll finds a slight reshaping of support for the two candidates since the last presidential election.

Trump leads Harris 54 percent to 45 percent among white voters, but her 9-point deficit is a slight improvement over the 12-point advantage Trump had with this group in 2020.

Trump leads Harris 54 percent to 45 percent among white voters, but her 9-point deficit is a slight improvement over the 12-point advantage Trump had with this group in 2020.

Harris instead has seen some erosion among Black and Latino voters, who together made up about 20 percent of the vote in 2020. Harris has support from 83 percent of likely Black voters and 61 percent of likely Latino voters – down 8 and 2 points, respectively, from the share that supported Biden in 2020.

In the vice president's closing argument to voters in recent weeks, she has emphasized reaching out to Republican voters who are disillusioned with Trump and tried to remind them of the chaos she said came with his time in the White House. Harris has campaigned in swing states with prominent Republican officials who have endorsed her, including former Reps. Liz Cheney and Adam Kingzinger. The PBS News/NPR/Marist survey suggests her efforts may be working.

Eight percent of Republicans say they will vote for Harris, up 3 points from a month ago and double the number of Democrats who say they will back Trump.

"In a close race, that's a big deal potentially," Miringoff said.

More than 78 million ballots have already been cast, according to the University of Florida Election Lab. Fifty-five percent of likely voters in this poll report already having cast a ballot. One-third of voters say they plan to vote in person on Election Day, including 40 percent of

Harris has 4-point lead over Trump in final PBS News/NPR/Marist election poll

Behind the top-line numbers, Miringoff noted some shifts at the margins that explain the coalitions lining up behind the two candidates and why polling continues to show a closer race.

Most notably: The gender gap has shrunk in half in the last month of the campaign.

Trump has held onto his lead among men, but it has shrunk to 4 points, down from the 16-point advantage he had over Harris in October. At the same time, 55 percent of women say they will back Harris in the latest survey. The vice president's lead among women has shrunk from 18 points to 11 points since last month.

The gender split in this poll is nearly identical to the one between Biden and Trump in 2020, according to AP VoteCast surveys of the electorate.

dramatic events unlike any other election year in modern American history: the sitting president and presumptive Democratic nominee withdrawing from the

race less than four months before Election Day; the first woman of color nominated as a major party candidate; two assassination attempts on the Republican nominee; and the same nominee convicted on 34 felony charges.

Despite all that, likely voters surveyed in this poll greatly resemble the 2020 electorate, which backed President Joe Biden with 51 percent of the popular vote to Trump's 47 percent.

WATCH: Harris and Trump appeal to voters with starkly different tones in final days of the election

"We've gone through all of this to get back to...pretty much where you ended up four years ago," Miringoff said. "We'll see if the Electoral College mirrors that."

Harris has 4-point lead over Trump in final PBS News/NPR/Marist election poll

Politics Updated on Nov 4, 2024 1:32 PM EST — Published on Nov 4, 2024 12:00 PM EST

On the eve of the 2024 presidential election, Vice President Kamala Harris holds a 4-point lead over former President Donald Trump among likely voters nationally, according to the latest PBS News/NPR/Marist poll. Harris has the support of 51 percent of likely voters to Trump's 47 percent – a lead just outside the poll's 3.5-point margin of error.

A little more than half of independents support the Republican nominee, a 5-point lead over Harris.

"It has been and remains a close election," said Lee Miringoff, director of the Marist Institute for Public Opinion. "As far as the popular vote is concerned, it's hers to lose."

Behance can be said to be the best design art platform, but now it is more and more troublesome to log in to the external network. I hope this article can help you. If it is really helpful, please +1 in the comment area.

Xiao B is currently the world's largest art and design work sharing platform, with millions of people publishing their works on it. It covers a wide range of fields, including design, fashion, illustration, industrial design, architecture, photography, fine arts, advertising, etc. It is also the most frequently used work publishing platform for designers. Top design companies at home and abroad will share their new works on XiaoB. Xiao B defines itself as "a leading platform for displaying and utilizing creative works." Some people regard it as a designer's blog, which contains detailed categories and content.

However, in November 2018, it is no longer possible to access Xiao B in China. Next, I will teach you how to access Xiao B without climbing over the firewall. If you like it, remember to save it and forward it for future use.

1. First open "My Computer" and enter the C drive
2. Then open windows
3. Open system32
4. Find drivers in it
5. Then open the etc folder
6. Select the host file and right-click to open the properties
7. Select Security, click Edit, select User, check Full Control, and click OK. Select Yes in the pop-up window.
- 8 Then use the laptop to open the host
9. Start a new line, enter the following characters, and save.

This way you can access it

I put this code here, you can copy it yourself

My thoughts after reading: Now finding information is just like buying ice cream. It is no longer ordinary. It is better to make your own ice cream at home.

How to solve the conflict between IP address and other systems on the

network [Backs Post Bar Update time: 2015-09-12 | Font size: large, medium, small]

[Guide] The error message you described appears because the IP address set by the network card conflicts with the IP address of another computer or other network device on the network. When this error message appears, it usually means that the IP address set by the network card conflicts with the IP address of another computer or other network device on the network. The so-called conflict means that the same address is used. The 00:20:ED:9E:55:B6 in the error message is the MAC address of the other computer or network device.

If your computer is in a local area network, and the network card IP address is automatically assigned by the local area network server, in Windows 2000 and other operating systems, you can click the "Start" button, select "Command Prompt" in "Accessories", and enter "ipconfig /renew" in the command line state to let the system release the current IP address and re-acquire a new address. In Windows 98, you can click the "Start" button, select "Run", type "winipcfg", and select Release the current IP in the dialog box that appears, and then re-acquire a new one. If your IP address is set to a fixed IP address, if you set it yourself, you can set another one. If it is assigned by the administrator, then you need to contact the administrator to report the IP address conflict problem and request to change the IP address or find the conflicting computer to correct it.

If you are using a computer in a stand-alone mode, you need to check which device among the devices you are using is the cause of the conflict, for example, whether the IP address of the ADSL modem is the same as the IP address of your network card.

The main reason is that the IP address of your network card is the same as that of other machines, which will cause such a problem!

The solution is:

If you are using XP, click "Start", then "Settings", enter "Network Connections", then find "Local Area Connection", right-click the local area connection, enter "Properties", do you see something called "TCP/IP?" Double-click "TCP/IP" with your mouse, enter and select "Obtain an IP address automatically" and that's it!

For 2000 system, click "Start", then "Settings", enter "Network and Dial-up Connections", then find "Local Area Connection", right-click the local area connection, enter "Properties", do you see something called "TCP/IP?" Double-click "TCP/IP" with the mouse, enter and select "Obtain an IP address automatically".

Another way is, if you are in a local area network, that is, you have many computers connected together, you can follow the above method, enter "TCP/IP", and see what is filled in "Use the following IP address", which is usually xxxxxxxxxx. You just need to change the last three xxx, and the range of change is 1-255. After changing it, restart the computer once and see if it works! If not, change it again. I think the numbers at the end are less used!

1. Do you know what your IP is?

Method: Start -> Run -> Enter cmd and press Enter -> Enter ipconfig and press Enter

This way you will see your IP address: the local area network is generally 192.168.*.*

2. Fix your own IP

Right click "My Network Places" -> Properties -> Right click "Local Area Connection" -> Properties -> Double click Internet Protocol (TCP/IP) in General -> Use the IP address below -> Add a number between 2 and 255 (Note: It is best to use a number close to the IP you obtained or use that directly) -> Use the IP address below -> Add a number between 2 and 255 (Note: It is best to use a number close to the IP you obtained or use that directly)

The subnet mask is obtained: half is 255.255.255.0. The default gateway is similar to the IP. If the IP is 192.168.1.25, then the default gateway is 192.168.1.1.

【百度贴吧 更新时间: 2010-09-12 | 字体: 大 中 小】

出现这种描述的错误提示,一般是网卡所设置的IP地址与网络上的另外一台电脑,或者其他网络设备的IP地址发生冲突,所谓冲突也就是使用了相同的地址,错误提示中的00:20:ED:9E:55:B6就是另外那台电脑或者网络设备的MAC地址。

如果您的电脑在一个局域网内，并且网卡IP地址是通过局域网的服务器自动分配的，在Windows 2000/XP等操作系统上，可以点击“开始”按钮，选择“运行”中的“命令提示符”，在命令行状态下输入“ipconfig /renew”，让系统释放当前的IP地址，重新获得一个新的地址。在Windows 98中，则可以单击“开始”按钮，选择“运行”，键入“winipcfg”，并在出现的对话框上选择释放当前IP，然后重新获取一个，若您电脑的IP地址设置为固定IP地址，如果您自己设置的，可以另外设置一个。如果是通过服务器分配的，那么您需要联系网络管理员，报告IP地址冲突的问题，要求网络管理员找出产生冲突的电脑并修正。

如果您在单机情况下使用电脑，那么您需要检查自己所使用的设备中哪一个设备是冲突的原因。例如 ADSL 调制解调器的 IP 地址是否与您的网卡 IP 地址相同等。

主要原因是，你的网卡设置的IP与其它机子的一样，就会出现这样的问题呢！

解决办法是：

如果你的系统是XP系统，点“开始”，然后“设置”，进入“网络连接”，然后找到“本地连接”，鼠标在本地连接那里点右键，进入“属性”，是不是看到一个叫“TCP/IP”的东西呢？用鼠标双击“TCP/IP”，进入以后选择“自动获得IP地址”便可以了！

2000系统是，点“开始”，然后“设置”，进入“网络和拨号连接”，然后找到“本地连接”，鼠标在本地连接那里点右键，进入“属性”，是不是看到一个叫“TCP/IP”的东西呢？用鼠标双击“TCP/IP”，进入以后选择“自动获得IP地址”便可以了！

另一个办法就是，如果你是处于局域网，就是你们是很多部电脑连接在一起的那种，你可以按照上述方法，进入“TCP/IP”，看看“使用下面的IP地址”那里填的是什么内容，一般是xxx.xxx.xxx.xxx的，你只要把最后三位xxx改一改便可以了，改的范围就1—255的数字，改了以后重新启动电脑一次，看看是否好了！不行就再改一次，我觉得比较后面的数字比较少人用！

1、了解自己的IP是多少？

方法：开始-》运行-》输入cmd后回车-》输入ipconfig回车
这样会看到自己的ip是多少：局域网一般为192.168.*.*

2. 固定自己的IP

右键“网上邻居”->属性->右键“本地连接”->属性->双击常规中的Internet协议 (TCP/IP)->使用下面的IP地址->添加一个2-255之间的数(注:最好是和你获得的IP接近的或者直接用那个。)子网掩码用获得:一半为255.255.255.0 默认网关好IP差不多。如果IP为192.168.1.25那么默认网关为:19

INTEGRITY PROJECT

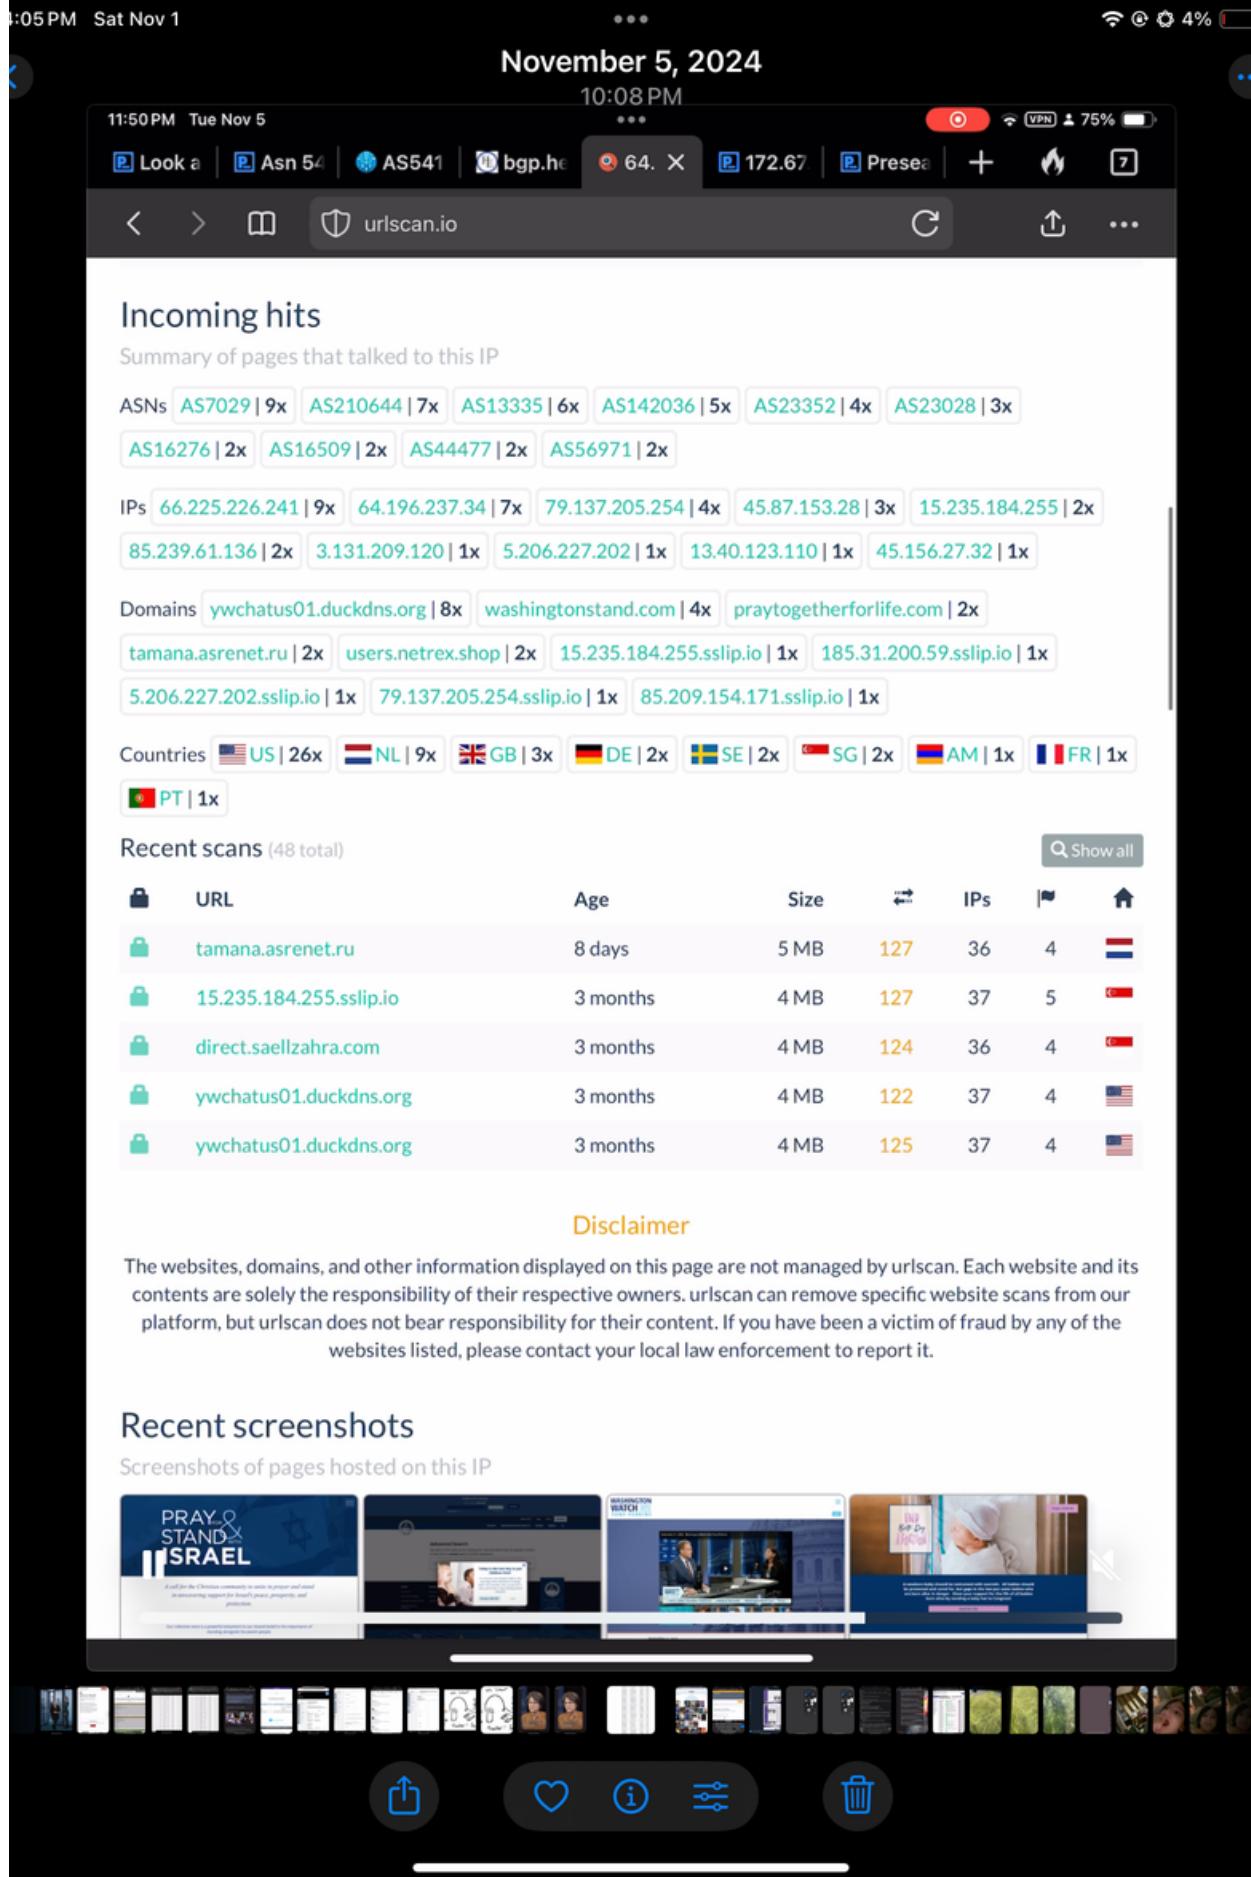

It's important that life and family values are preserved in the Republican Party Platform.

Research shows that elected leaders vote in line with their party's platform over 80% of the time and this guiding document sets the standard for the party. The GOP Platform has a strong pro-life, pro-family, and pro-freedom track record. Encourage your state's delegates to protect these fundamental issues when they meet in Milwaukee to draft the new Platform July 8 and 9.

0 JavaScript Global Variables

These are the non-standard "global" variables defined on the window object. These can be helpful in identifying possible client-side frameworks and code.

0 Cookies

Cookies are little pieces of information stored in the browser of a user. Whenever a user visits the site again, he will also send his cookie values, thus allowing the website to re-identify him even if he changed locations. This is how permanent logins work.

1 Console Messages

A page may trigger messages to the console to be logged. These are often error messages about being unable to load a resource or execute a piece of JavaScript. Sometimes they also provide insight into the technology behind a website.

Source	Level	URL Text
